

Presidential Statement on Assassination Attempt Against Ford

by Lyndon H. LaRouche, Jr.

U.S. Labor Party Candidate for President of the U.S.

September 5, 1975

Sept. 5—Today's assassination attempt by a member of the Charles Manson cult against President Gerald Ford must hasten the immediate closing-down of the Rockefeller-created brainwashing network throughout the United States.

While it is not clear who, if anyone, ordered the attack on Ford, the fact that the attempted murderess is a manifest zombie leads us to consider just where such zombies are created. It is a matter of public knowledge that the main sources of zombified psychotics in the United States are methadone maintenance centers, prison rehabilitation centers, transactional analysis groups and other so-called community mental health, drug or behavioral therapy institutions—most of which are advised, funded or administered by persons or institutions (like the Law Enforcement Assistance Administration) connected with the Rockefeller family and cabal. Miss Fromme, as a member of the Manson cult, was open to the influences of one such notorious brainwashing institution, the Esalen Institute.

The Labor Party is not an adherent to the "lone assassin" theory, but the possibility of such a criminal action cannot be eliminated *as long as* the Rockefeller-created brainwashing network remains intact. Members of the Labor Party have been subjected to a wave of rape attacks from LEAA-connected prisoner and drug rehabilitation centers. Their blank stares and incoherence, as well as their record of "therapy," marked these assailants as manifest victims of induced psychosis and as under the control of authorities hostile to the Labor Party. Persons concerned with the health of the President and the nation would do well to look into miss Fromme's immediate associates prior to her assassination attempt, to see if any such controlling figure appears, and who, in fact, he would be serving in "suggesting" or ordering such an attack.

One major step toward eliminating such dangerous lawlessness in the United States would be the refusal of Congress to renew funding for the Law Enforcement Assistance

Administration, which is applying for a renewal of funds this coming October. Local officials in Colorado and Boston have already taken measures to eliminate crime from the streets by eliminating the LEAA.
